PROFESSIONAL SUMMARY

Second-year Software Engineering student at ENSA Khouribga, passionate about AI and software architecture. Skilled in **Java/Spring Boot**, **React**, and **IoT** solutions. Combining analytical rigor with creative problem-solving, I am seeking a **2 to 3 month internship** (Capstone Project) to contribute to innovative technical projects and further develop my engineering expertise.

TECHNICAL SKILLS

- **Web & Backend:** Java (JEE, Spring Boot), Python (Django), PHP (Laravel), Node.js, Express.js.
- **Frontend:** JavaScript (ES6+), React.js, HTML5, CSS3, DOM, Responsive SPA.
- **Data & Databases:** SQL, MySQL, MongoDB, Oracle, PL/SQL, Basics of Big Data (Hadoop, Spark).
- **DevOps & Cloud:** Docker, Kubernetes, AWS, Git/GitHub, Linux (Bash), Maven, CI/CD pipelines.
- **IoT & Embedded:** C++, ESP32 Programming, Sensors (YF-S201), Hardware-Software Integration.

PROFESSIONAL EXPERIENCE

- | | |
|--|--|
| IoT & Software Engineering Intern
<i>ONEE (National Office of Electricity and Drinking Water)</i> | July 2025 – August 2025
<i>Errachidia, Morocco</i> |
| <ul style="list-style-type: none">• IoT System Design: Engineered a connected solution (ESP32) for real-time collection and analysis of domestic water consumption metrics.• Full Stack Development: Developed an interactive dashboard (React, Django) to visualize KPIs and generate anti-wastage alerts.• Optimization: Implemented anomaly detection algorithms (leak detection) to improve water resource management.• <i>Tech Stack: Python, Django, React, MySQL, IoT Sensors, C++.</i> | |

KEY ACADEMIC PROJECTS

- | | |
|--|-------------|
| Medical Management System (Full Stack App) | 2024 |
| <ul style="list-style-type: none">• Developed a comprehensive web platform to digitize administrative processes (Patient records, Appointments).• Implemented secure architecture with Role-Based Access Control (RBAC) and automated prescription generation.• <i>Technologies: Java JEE, Spring Boot, React.js, MySQL.</i> | |
| Ready-to-Wear E-commerce Platform | 2024 |
| <ul style="list-style-type: none">• Designed and deployed a marketplace featuring a vendor back-office and a seamless customer front-end.• Modeled the relational database and strictly adhered to MVC architecture for code maintainability.• <i>Technologies: PHP, Laravel, JavaScript, SQL.</i> | |

EDUCATION

- | | |
|--|--|
| State Engineer Degree in Computer Science
<i>National School of Applied Sciences (ENSA)</i> | 2024 – Present
<i>Khouribga, Morocco</i> |
| <ul style="list-style-type: none">• Specialization: Advanced Software Technologies Systems Engineering. | |
| University Diploma in Scientific and Technical Studies (DEUST)
<i>Faculty of Sciences and Techniques (FST)</i> | 2022 – 2024
<i>Errachidia, Morocco</i> |
| <ul style="list-style-type: none">• Major: Mathematics, Computer Science, and Physics (MIP). | |

LANGUAGES & ACTIVITIES

- **Languages:** English (B2 - Technical), French (Fluent), Arabic (Native).
- **Soft Skills:** Agile Methodology (Scrum), Design Thinking, Problem Solving, Teamwork.
- **Leadership:** Head of Design & Media Unit at *JLM ENSA Club* (Team management, Content creation).
